

# Comm1

The Local 1

## Comm1's Redundant Fiber Map

Comm1 has installed a state-of-the-art fiber ring between the communities we serve. This ring is connected to the statewide fiber network managed by Iowa Network Services. It gives us the ability to offer a redundant fiber connection between the communities we serve and major cities in our region.

This fiber ring enables us to provide a wide range of powerful telecommunication products to our residential and business customers. Foremost amongst these services is a fast Internet connection designed to meet the needs of today's businesses. This fast connection is available with competitive pricing and is backed up by friendly local service you can rely on.

For more information, contact our office at 1-800-469-3772 or 641-762-3772. You can learn more about the statewide fiber network by visiting [www.iowanetworkservices.com](http://www.iowanetworkservices.com).
